

***NEUTRONE® SIDE ENTRY MIXER
N5SE SERIES***

INDUSTRY & APPLICATIONS

All side-entry mixer applications require high flow efficiency in order to meet one or more of the following criteria:

- Blending components
- Homogenizing (preventing stratification)
- Preventing the build-up of solids and heat transfer

Oil & Gas	: Crude Storage, Bottom Sludge and Water Control Crude Oil / Petroleum Product Blending Maintaining temperature Uniformity / Homogeneity
Edible Oil	: Tank Bottom Sludge Control Maintain "Foods" (Seeds / Husks) in Suspension Blending / Temperature Uniformity / Stratification Prevention
Pulp & Paper	: Reduced Bottom Storage Towers and Blow Tanks Couch and Press Pit Pulpers High Density Down Flow Bleach Towers
Chemical	: Combine Additives and Achieve Uniformity
Waste Treatment	: Sludge Holding Tanks

Therefore, **NEUTRONE® SIDE ENTRY MIXERS, N5SE** series have a range of gear driven side-entry mixers from **0.75kW to 7.5kW** which will suit all required permutations.

**NEUTRONE® UNIQUE SHUT OFF DEVICE
WITHOUT DISMANTLE GEARED MOTOR
FOR THE REPLACEMENT/REPAIRING OF
THE SINGLE FULL CARTRIDGE
MECHANICAL SEAL**

OUR ORGANIZATION

AFTER SALES & SERVICES

Our support service teams are readily available to support your process equipment at all times. Genuine spare & service solutions can be obtained from **TRIMAX CENTURY SDN BHD** and to ensure the operating capacity value of our **NEUTRONE® SIDE ENTRY MIXERS**.

GUARANTEE

All our products are built and designed to meet customer requirement and we provide warranty periods that are appropriate for the specific industries where our **NEUTRONE® SIDE ENTRY MIXERS** were installed or located.

QUALITY

TRIMAX CENTURY SDN BHD recognized that our customer demand on high quality product manufactured and serviced in timely and efficient manner. Working within the process industries, we are aware of the specific demands for the quality standard.
